

LEON LINK PRESENTS

Ledgerline User Guide

Book the job. Show the week. Get paid.

app.leonlink.net

1. Create your workspace

1. Go to app.leonlink.net and click **Create free workspace**.
2. Enter your business name, work email, and a password (6+ characters). You're in — no card needed to look around.
3. Your plan starts at **Starter, \$29 per 6 months (\$4.83/mo)**. Choose it under **Settings** → **Subscription** whenever you're ready. Card payments unlock immediately.

Tip: Explore first with the live demo (password: **demo**) — it's the full app loaded with sample data.

2. Connect Stripe so customers can pay by card

- 1 Create a free Stripe account at dashboard.stripe.com/register. Add your business details and the bank account for payouts.
- 2 In the Stripe Dashboard, open **Developers** → **API keys**.
- 3 Copy the **Publishable key** (starts `pk_live_`).
- 4 Click **Reveal** next to the **Secret key** (starts `sk_live_`) and copy it. Stripe shows it only once.
- 5 In Ledgerline, open **Settings** → **Card payments**, paste both keys, and click **Save settings**.

Done. Every invoice now shows a *Pay now* button. Stripe charges its standard processing fee (about 2.9% + 30¢); Ledgerline adds nothing. Want to practice first? Use Stripe's Test mode keys (`pk_test_`/`sk_test_`). Your secret key is encrypted before we store it.

3. Book a job (while you're still on the phone)

1. Click **+ Job** (top right) or open **Schedule** and click a day on the calendar.
2. Type the customer's name — new customers are created automatically, no separate signup.
3. Pick date, time, job type, and price. Set **Repeats** for recurring work (weekly, every 2 weeks, monthly) — the next visit is scheduled automatically when you mark a job done.
4. Save. The job appears on the calendar, the customer's portal, and your dashboard.

Views: Month for planning, Week for the truck, List for catch-up. Everything is color-coded by status.

4. Estimates: send, they accept, you schedule

1. Open **Estimates** → **New estimate**. Add the customer (or create inline) and line items.
2. Click **Send to customer**. They get an email with a link — no app to install.
3. When they accept, it lands in **Requests**. Open it, pick a date, click **Accept & schedule** — it becomes a job.

5. The customer portal (Growth plan and up)

Every customer has their own portal link: estimates to accept, invoices to pay, files and photos, and a message thread with you. Find it on any customer's page: **Customers** → **tap a customer** → **Copy portal link**, or click **Email portal link** to send it.

Tip: text the portal link right after booking — customers who can see the estimate accept faster and pay on time.

6. Get paid

- **Card:** send an invoice, customer clicks *Pay now*, money lands in your Stripe account. Works on Starter and up.
- **Cash or check:** open the invoice and mark it paid. Always free.
- **Reminders:** email reminders go out automatically ~24h and ~2h before each job (Growth+). SMS reminders on Command. Toggle them in **Settings** → **Reminders**.

7. Get more Google reviews

1. In **Settings** → **Reviews**, paste your Google review link (from your Google Business Profile → "Ask for reviews").
2. After a job, open the customer and click **Request review**. Email on Growth, email + SMS on Command.

8. Your data is yours

Settings → **Your data**: one click downloads every customer, job, invoice, and estimate as CSV. Leave whenever you want — we earn the renewal, we don't trap you.

9. Plans at a glance

	Starter — \$29 / 6 mo	Growth — \$149 / 6 mo	Command — \$279 / 6 mo
Per month, flat	\$4.83	\$24.83	\$46.50
Card payments on invoices	✓	✓	✓
Estimates, schedule, unlimited customers	✓	✓	✓
Customer portal for clients	—	✓	✓
Email reminders	—	✓	✓
Review requests + cloud files	—	✓	✓
SMS reminders	—	—	✓
Per-user fees, add-ons	None. Whole crew included, on every plan.		

Every plan: 6-month terms, no annual lock-in, one-click data export.

10. Your team (free on every plan)

Add people under **Settings** → **Team** — their own email and password, unlimited seats, no per-user fees. Pick an access level for each:

Level	Can do	Can't do
Admin	Everything except billing	Change plans, manage billing
Dispatcher	Run the day: jobs, customers, estimates, invoices, files, messages	Settings, team, billing
Crew	Schedule, customers, complete jobs, photos, messages	See money, settings, delete anything

Tip: give field techs **Crew** — they see today's route and mark jobs done, and the money stays between you and the office.

11. Questions

- **Card fee?** Stripe's standard ~2.9% + 30¢, nothing from Ledgerline.
- **Hired someone?** Add them under **Settings** → **Team** at no extra cost — every plan includes unlimited seats.
- **Need help?** info@leonlink.net
